

**Retrofits existing
equipment**

**Integrates with any
access method**

**Lightning-fast
Deployment**

**Centralized admin
dashboard**

Automate access with a pocket-friendly GateKit.

GMP Access is an IoT GateKit that retrofits seamlessly with your existing access equipment to make it smarter and faster. Enable smart identification technology while setting up touchless, cashless payment methods with custom-branded apps or QR technology. Provide a hands-on parking experience for both your regular visitors and walk-in parkers.

Features

- Real-time reports and actionable insights on your admin dashboard
- Plug & Play installation in four hours with off-the-shelf components
- Cut upgrade costs on new equipment with our retrofit technology
- Enable lightning-fast access methods like LPR, QR and RFID
- Universal credentials to enable multi-access across locations
- Upgrade and remotely control your offline barrier gates

Trusted By Market Leaders

A parking operator in Germany wanted to upgrade their legacy parking equipment and software. GMP Access streamlined their entry/exit, with RFID/LPR access for monthlies and Reverse-QR technology for transient parkers via a custom-branded app. They opened revenue streams by partnering with logistics companies, using LPR for faster and automated free-flow parking.
