# Ticketless AI-PARCS

Set up ticketless parking in your locations with ExpressLane. Turn parking into a seamless self-serve experience with AI-assisted Vehicle Matching technology for automated access and payments.

GMP AI helps you achieve 3x entry/exit speed.

Gates open automatically!

DRIVE IN
Camera reads the plate when the parker drives in.

PARK
Add payment method or use the app

DRIVE OUT
Camera reads the plate to ensure payment is captured

Reduce Support Calls by 84%	Optimize Revenue Capture	Session Accuracy up to 99.8%

GMP AI fixes broken sessions in real-time.

- Adjusts lighting in pictures in low-light environments
- Auto-crops plate reads for faster session matching
- Trained on millions of reads from 1000+ cameras around the world
- Manual misread correction to train GMP AI

Go Beyond LPR with our Vehicle Similarity Model

Data scientists train GMP AI specifically for parking, based on millions of images from around the world so that it can identify vehicles by their make and model, not just their license plates. GMP AI compares vehicle signatures to find a match even if the read is unclear.
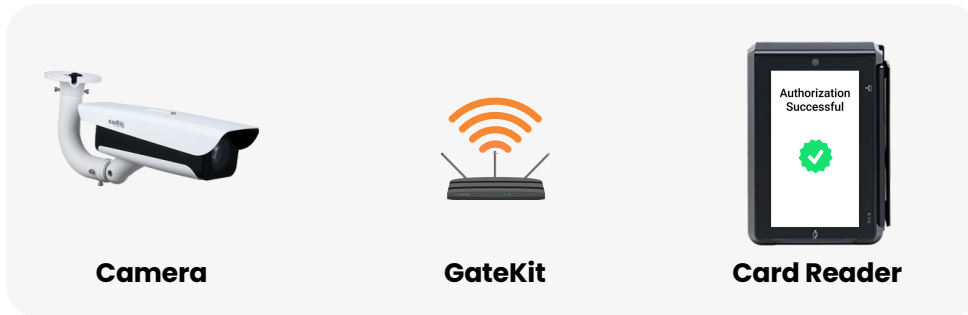

Match found

Exit

Entry

Our team manually fixes the remaining 0.2% sessions, sending feedback to AI for training.
